Dear Mike,

This proposal outlines the hardware and labor required to re-organize the main distribution frame rack that houses much of the core network equipment for the Wheaton Park District. Cable management has reached a point that prohibits safe and easy switching of hardware into the rack and exposes the potential for damaging cables and ports on switches when having to move the wiring in order to transition hardware in and out of the rack. Additionally, the problematic wiring creates the lack of means to efficiently trace wiring from patch panel to switch, as well as between equipment, limiting the ability to more accurately document and make changes to the network without unintentionally bringing system down. Removing all of the cabling and installing the cables in a clean and orderly fashion will allow resolve this current and potential issues, while also affording for future cabling to be done according to the new standard.

Labor - Rack Organization

In order to rework the cabling in the server room, WPD will need to provide two windows of overnight downtime, at 8 hours each. The labor quoted here includes this after hours work.

Correct Cabling

Replace server room cables with cables of the correct length, ensure all cables are neat and organized. Run new cables from server rack to switching rack where needed.

Remove old Equipment

Remove old equipment, condense and move all patch panels, switches, server, and all networking equipment in all racks.

Labor - Rack Organization Subtotal: **$7,560.00**

Payment Terms

In order to initiate the work, AIE requires a signed copy of the agreement along with 100% down payment on all hardware and licensing and 50% down payment on all labor. The balance of the labor, along with any additional surcharges or tax, will be billed Net20 upon completion of the work.
