Dear Mike,

This proposal is a follow up to the ongoing security discussions; in particular, the discussion we had regarding email awareness training and phishing simulation emails in order to better educate the Wheaton Park District's staff on how to identify and avoid phishing attempts. The following measure will continue to strengthen the Wheaton Park District's security posture:

3) Dark web monitoring. This is a new service being offered by AIE. Wheaton Park District's entire email domain as well as any desired personal email addresses (up to 10) will be continuously monitored for compromises of credentials or PII on the dark web. AIE will reach out to users for whom compromises are found for remediation steps, while management will have the ability to view reports on compromised accounts.

Please let us know if you have any questions.
