Dear Mike,

This project is to replace the existing UPS that lacks a critical feature for powering up devices after a power outage. During the recent storms, the UPS drained its battery and eventually shut down, leading to the firewall, core switch and modem to go offline. When the power was restored, the current UPS, lacking the ability to automatically recover, left all critical devices that were plugged into it in the offline state. The new UPS being proposed has the ability to recover, allowing for all devices plugged into the UPS to turn back up as soon as power is restored.

Additionally, AIE is proposing the option to clean up the rack equipment and cabling while also removing dead equipment, including old phone systems and switches. As part of the cleanup AIE would also move the live equipment which currently rests on top of the rack into the rack where it belongs.

Please let us know if you have any questions at all.

Delivery Date: 08/25/2020
Expiration Date: 09/18/2020**Assumptions**

- There is a 2 person job, which will take approximately 2 hours to complete.
- There will be a short downtime while equipment is moved to the new UPS. This should be no more than 10-15 minutes.
- Client staff will be available in a timely manner for questions and testing of changes.
- Client will provide all necessary software discs, serial numbers, and passwords for any software needing to be reinstalled.
- The work will be completed Monday-Friday / 7:30am-5:30pm, unless otherwise designated by AIE.

Should any of these assumptions prove to be incorrect, additional labor will be billed at AIE's standard rates of \$135/hr.

Quote Summary

Description	Amount
Hardware	\$952.00
