Dear Mike,

This quote details the recurring monthly costs for monitoring and management of the VMS server for the security camera system. Monitoring/management of this will be necessary for protection of the device when it is connected to the same network where the current production servers currently reside. Connecting the device on the same network with the production servers is necessary in order to facilitate remote access of the camera systems at the various locations from inside and outside the Wheaton Park District network.

Please review this quote at your convenience and return a signed copy if it is acceptable. Also let me know if you have any questions.
